

Makoto Miyazaki

Makoto Miyazaki (M.Pharm, Pharmacist) is currently working as an associate director, Drug Safety / Pharmacoepidemiology at MSD K.K. He earned both Bachelor and Master degree in pharmacy from Tokyo University Japan. In 2011, after experiencing activities for safety and quality of pharmaceutical products in Eli Lilly Japan, he joined MSD K.K. for pharmacovigilance activities of various therapeutic areas including vaccines / infections. He is recently focusing on optimizing a utilization of real-world data (e.g. claims, electronic health records and DPCs) into pharmacovigilance activity, based on his background expertise of pharmacoepidemiology. His field has been expanded from a company to academia and industrial association. He was certificated as Pharmacovigilance Specialist by Japanese society of pharmacoepidemiology and now is a member of the journal review board of its society. Since 2018, he is one of the leaders in pharmacovigilance committee of the Japan Pharmaceutical Manufacturers Association, having discussions with Japanese regulatory agencies for safety-related regulations.
