

Domenico Criscuolo

I graduated in Medicine, with PhD in Haematology and in Clinical Oncology. I started my career as Pharmaceutical Physician in 1975, and in more than 40 years I had key positions in big pharma (Lepetit, Roche), in biotech companies (Novuspharma, Creabilis) and in CROs (Premier Research, ICON). In 2007 I founded Genovax, a biotech company whose mission is to discover and develop therapeutic vaccines for chronic diseases.

I am Past President of SSFA (the Italian Association of Pharmaceutical Medicine) and Past President of IFAPP (the International Federation of Associations of Pharmaceutical Physicians and Pharmaceutical Medicine): I devote most of my time to educational programs in Pharmaceutical Medicine, teaching at various master courses in Italian Universities.
